Closing Checklists
March 2006

Conservation entities that have cooperative agreements with the NRCS to acquire a conservation easement have two methods in which to receive NRCS payment.

- 1) Entities that are unable to provide the full amount of the conservation easement at the time of closing can request an advance of funds from the NRCS. This option should be used only as a last resort as several additional requirements are necessary in order to comply with NRCS, National Finance Center and Commodity Credit Corporation regulations. To request an advance of funds, a waiver request must be submitted to the State Conservationist a minimum of 60 days prior to the scheduled date of closing. For more information on requesting an advance of funds, please contact Bill White, Leader for Programs.
2. The second (and preferred) alternative is to have the conservation entity make full payment to the landowner at the time of closing and submit a Request for Reimbursement (Form SF-270) to the NRCS along with the required closing documents. Upon receipt of the Request for Reimbursement and the necessary closing documents, payment will be made, via electronic transfer, usually within 72 hours.

Most of the forms and documents referenced in these checklists are available off the NRCS web page at: <http://www.or.nrcs.usda.gov>. Click on "Farmland Protection". Documents and forms are also available from the NRCS State Office.

If there are any questions or clarification needed on any of these requirements, please contact Bill White, Leader for Programs, at the above address.
